Dear customer,

Please read the following information on the use and safety of our furniture carefully so that you can enjoy these unique furnishings for a long time.

The manufacturer and importer within the meaning of the Product Safety Regulation (GPSR) with the brands 'OPIUM OUTLET' and 'VintageAsia' is:

Heinz Werner Textil-Aussenhandel & Vertriebs GmbH

Wollbacher Str. 31, 97654 Bastheim, Germany

Phone no.: +49 9773 1424, eMail: info@hw-fashions.de

Responsible person: Erik Werner, Wollbacher Str. 31, 97654 Bastheim, Germany

Phone no.: +49 9773 1424, eMail: info@hw-fashions.de

Our furniture is manufactured for 'general (private) residential use'. It is not intended for commercial or contract use! Please observe these instructions for use and safety, especially in households with children. children.

Furniture should not be placed too close to walls, windows/doors and radiators. Sufficient air circulation must be ensured. The floor and walls must be level and straight and suitable for the safe positioning and alignment of heavy objects such as household furniture. Tipping, jamming and leaning of the furniture must be avoided. For safety reasons, we recommend additional wall fixings for furniture from a height of approx. 100 cm and for all shelves.

The load-bearing capacity of the furniture, shelving units, shelves, racks and drawers is limited and should not exceed a total weight of approx. 10 KG. The rule of thumb here is a maximum load of 600 grams per 10 x 10 cm surface. Please ensure that the stand is adequately secured and fixed to the wall.

We recommend using standard household cleaners and washing-up liquid for maintenance. The use of special furniture polishes is not necessary. Please refrain from the use of floor polish, steam jets and similar products and keep all cleaning agents away from children. Please ensure a suitable room climate and sufficient humidity for wooden furniture. This applies in particular when using underfloor heating, where sufficient air circulation and distance from the floor are important.

### **Our furniture is only suitable for indoor use.**

Please avoid moisture, dirt and the effects of the weather and note that prolonged contact with objects such as doilies, covers and underlay materials can lead to chemical reactions, colour changes and material damage.

As we deliver our wooden furniture almost exclusively fully assembled, special instructions for use and assembly and installation instructions are not necessary. We accept no liability for third-party furniture and/or additionally assembled parts.

Real wood furniture is a one-off with a unique appearance. Wood changes when exposed to sunlight and light. Absolute colour and structure uniformity cannot be guaranteed and is customary in the trade. Solid wood works and must be specially protected. It is not suitable for underfloor heating as it can warp, shrink and form cracks and open joints. Here it is particularly important to maintain a balanced average room climate of 18-23 degrees Celsius and an average relative humidity in the range of 40-55%.

It is generally known that new products can smell at first. Depending on the material and composition, this can last for several weeks or months. The best way to deal with this is frequent ventilation and the use of commercially available cleaning agents (without acidic ingredients) and odour neutralisers.

We wish all our customers much pleasure with our unique pieces of furniture.
